License Activation

Overview

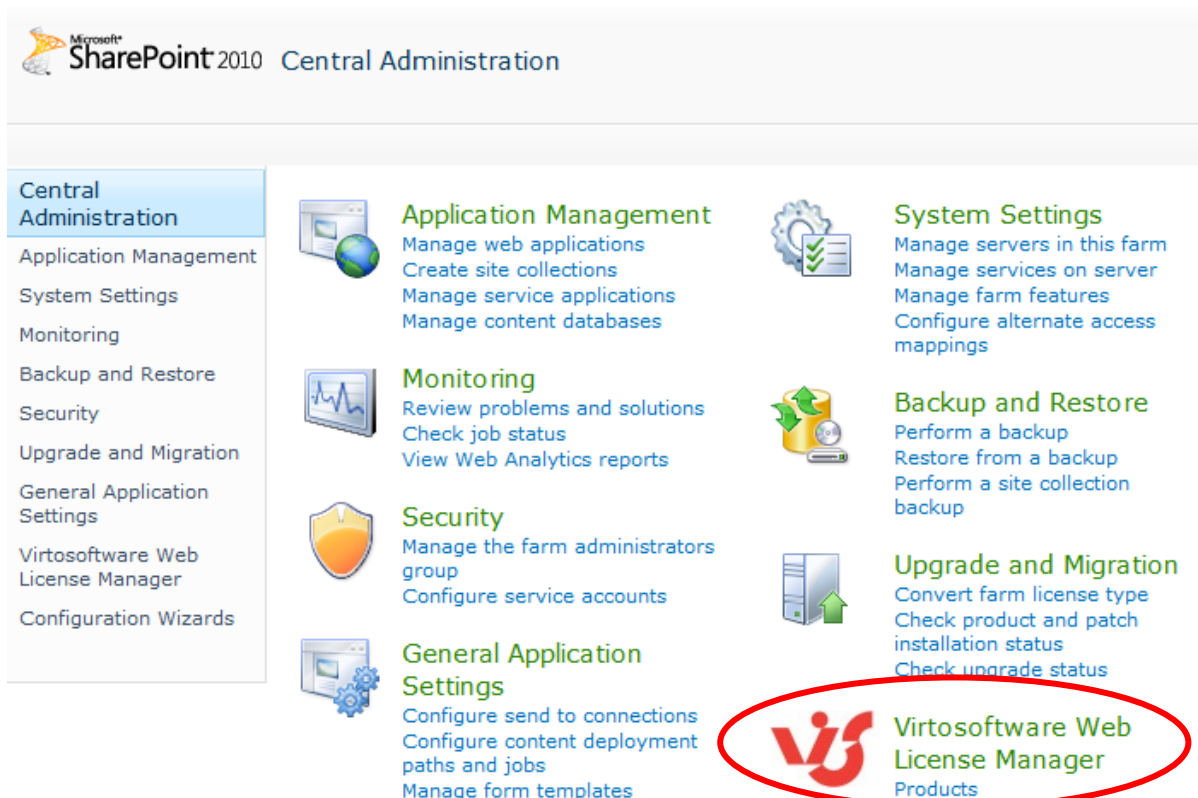

This document describes how licenses for Virtosoftware components can be activated. There are two ways of activation – manual activation (offline) and online activation. You can use any of these options depending on availability of the Internet connection at the moment of activation.

The actions described below refer to SharePoint 2010 version. Activation for 2007 and 2013 versions are similar.

License Activation

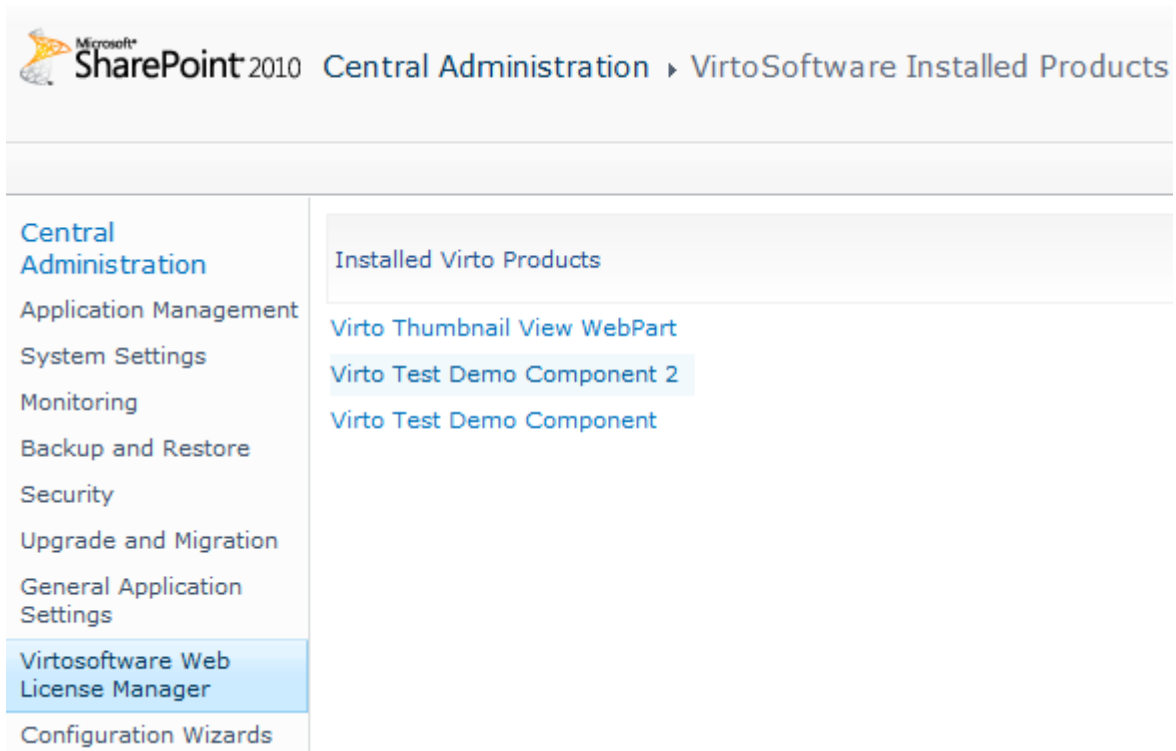

License Manager is included into the .zip archive prepared for installation of your component. Please unzip and install it in order to run activation process.

To activate the license go to “Central Administration – Virtosoftware Web License Manager”. Click “Products”.

You will see the list of all Virtosoftware components installed on your servers.

Note: activation for all components is absolutely the same.

License Manager window will be displayed. Here you can find solution name, license status, server name and activation fields.

Note: in case you have more than one web front end server in the list and you purchased licenses for them, run activation for every server in turn.

Solution name:	Virto Demo Component Package.wsp
License Status:	Trial. 28 days left.
	To activate the license please fill in the fields below. If your server machine has Internet access, you can use "Activate online" button. If the server does not have Internet access, send us the request to support@virtosoftware.com for offline activation with Serial Number and Machine Code and then use "Activate offline" button with received activation code.
	User name: <input type="text"/>
	Organization: <input type="text"/>
	E-mail: <input type="text"/>
	Serial number: <input type="text"/>
	Machine code: (for offline activation) S9RP3-TUR09-7PVX1-21SFJ
	Activation code: (enter to activate offline) <input type="text"/>
Available servers:	
<input checked="" type="radio"/> SPS4SPS2010 (SingleServer)	
	<input type="button" value="Activate online"/> <input type="button" value="Activate offline"/>

Pay attention to the value of "Status" field:

- **Trial** – you are using trial version.
- **Error** – the trial period is expired.
- **Unlocked** – you have entered the serial number but have not activated the license yet.
- **Activated** – the license is activated.

Online Activation

Online activation requires Internet connection. To start registration, fill in the fields in the form: **user name, organization, e-mail, serial number**. Activation code is not required for online activation.

Then click “Activate Online”.

Solution name:	Virto Demo Component Package.wsp		
License Status:	Trial. 28 days left.		
To activate the license please fill in the fields below. If your server machine has Internet access, you can use "Activate online" button. If the server does not have Internet access, send us the request to support@virtosoftware.com for offline activation with Serial Number and Machine Code and then use "Activate offline" button with received activation code.			
User name:	<input type="text" value="John Smith"/>		
Organization:	<input type="text" value="MyCompany"/>		
E-mail:	<input type="text" value="mycompany@com"/>		
Serial number:	<input type="text" value="DMCS-EY612-NM6C0-07FY-UPRE"/>		
Machine code: (for offline activation)	<input type="text" value="S9RP3-TUR09-7PVX1-21SFJ"/>		
Activation code: (enter to activate offline)	<input type="text"/>		
<input type="button" value="Activate online"/>		<input type="button" value="Activate offline"/>	

If you have internet connection, the license will be activated and status of the product will change to “Activated”.

In case there is no internet connection, the status of your component will turn to “Unlocked”. You may use your product within the period mentioned in “License Status” field. But you still need to activate your license.

Solution name:	Virto Demo Component Package.wsp
License Status:	Unlocked. 6 days left.

To continue activation you need to try online activation again or use offline activation.

Manual Activation (Offline)

Manual activation does not require Internet connection. To activate your license from the “Unlocked” status (see previous section) or from “Trial” status, enter your serial number and activation code. (If you continue activation from unlocked status enter just activation code). Click “Activate offline”.

Solution name:		Virto Demo Component Package.wsp	
License Status:		Unlocked. 6 days left.	
<p>To activate the license please fill in the fields below. If your server machine has Internet access, you can use "Activate online" button. If the server does not have Internet access, send us the request to support@virtosoftware.com for offline activation with Serial Number and Machine Code and then use "Activate offline" button with received activation code.</p>			
Available servers:		User name:	John Smith
<input checked="" type="radio"/> SPS4SPS2010 (SingleServer)		Organization:	MyCompany
		E-mail:	mycompany@com
		Serial number:	DMCS-EY612-NM6C0-07FY-UPRE
		Machine code: (for offline activation)	S9RP3-TUR09-7PVX1-21SFJ
		Activation code: (enter to activate offline)	<input type="text" value="DMCS-3DV9F-7SAF3-2NDDK-J1NJK-84MC0-Q3TMU"/>
		<input type="button" value="Activate online"/>	<input type="button" value="Activate offline"/>
		<input type="button" value="Deactivate"/>	

If the license is successfully activated, you will see its new status ("Activated").

Solution name:		Virto Demo Component Package.wsp	
License Status:		Activated.	
Available servers:		User name:	John Smith
<input checked="" type="radio"/> SPS4SPS2010 (SingleServer)		Organization:	MyCompany
		E-mail:	mycompany@com
		Serial number:	DMCS-EY612-NM6C0-07FY-UPRE
		Machine code: (for offline activation)	S9RP3-TUR09-7PVX1-21SFJ
		<input type="button" value="Deactivate"/>	

The licenses stay activated in case of changing hardware (HDD, RAM, video card and etc.) because they are related to ID SharePoint stored in the data base.
